

### **Citing journal articles with a single author**

Holt, R. D. 1990. The microevolutionary consequences of climate change. *Trends in Ecology and Evolution* 5:311-315.

#### *Notes:*

1. Give the author's last name (surname) first, then *initials only*, not the author's full given names (Holt, R. D., not Holt, Robert David).
2. The year of publication (1990), followed by a period, is placed immediately after the author's name.
3. The title of the article (The microevolutionary consequences of climate change) is set in lowercase, except for the initial capital and any proper nouns (see the word *British* in the next example). The title is followed by a period.
4. The title of the article is *not* italicized.
5. *No quotation marks* enclose the title of the article.
6. The journal name (*Trends in Ecology and Evolution*) follows full capitalization rules for titles (each word is capitalized except for conjunctions, articles, and prepositions).
7. The journal name is *not* italicized.
8. The volume number and page range for the article, separated by a colon, without any spaces (5:311-315), follow the journal name without any intervening punctuation (*Trends in Ecology and Evolution* 5:311-315).
9. A period appears after the page range to end the citation.
10. In-text reference to this article would be: Holt (1990) or (Holt 1990). Do *not* give the particular page(s) cited for in-text citations of journal articles.

### **Citing journal articles with a two or more authors**

Lennon, J. J., P. Koleček, J. J. D. Greenwood, and K. J. Gaston. 2001. The geographical structure of British bird distributions: diversity, spatial turnover and scale. *Journal of Animal Ecology* 70:966-979.

#### *Notes:*

1. The first author's name is entered in the same way as for a single-author journal article: last name first, followed by initials for given name(s).
2. Names of the second and any additional authors are *not* inverted: initials for given name(s) *first*, followed by last name.
3. All other elements appear exactly as for a single-author journal article.
4. In-text reference to this article (*three or more* authors) would be: Lennon et al. (1990) or (Lennon *et al.* 1990). Note that *et al.* (an abbreviation for *et alii*, Latin for *and others*) is italicized.

5. For articles with *exactly two authors*, use *and* instead of *et al.*: Brown and Smith (2004) or (Brown and Smith 2004).

### **Citing books**

Darwin, C. 1859. The origin of species by means of natural selection. Murray, London.

#### *Notes:*

1. The book title is *not* italicized.
2. Author names (single or multiple) and year of publication appear just as they would for a journal article.
3. The name of the publisher and the city of publication, separated by a comma and followed by a period, end the citation.
4. No page numbers are given. You may cite page numbers in the text, if necessary, as shown in the next note.
5. In-text reference to this book would be: Darwin (1859) or (Darwin 1859). To cite a particular page in a book: Darwin (1859, p. 325) or (Darwin 1859, p. 325).

### **A titled chapter in an edited book**

Colwell, R. K. 1984. What's new? Community ecology discovers biology. Pages 387-397 *in* Price, P. W., C. N. Slobodchikoff, and W. S. Gaud, eds. A new ecology: novel approaches to interactive systems. Wiley, New York.

#### *Notes:*

1. The format for authors, year of publication, and title of the *chapter* (What's new? Community ecology discovers biology) follows the rules for journal articles.
2. The pages that the chapter occupies in the book appear as shown above in the example (Pages 387-397), followed by the italicized word *in*.
3. The editor (or list of editors) of the book itself appears just as for a journal article, but is followed by: "ed." (for one author) or "eds." (for more than one editor). In the example: Price, P. W., C. N. Slobodchikoff, and W. S. Gaud, eds.
4. The publisher and city of publication end the citation entry, as for any other book.
5. In-text reference to this article would be: Colwell (1984) or (Colwell 1984). The editors are not mentioned in this case.

This document is based on one written by R. Colwell, and is used with his permission.
