RESEARCH INTERESTS

I am broadly interested in the processes that form and limit, where species are distributed, and their roles are in communities and ecosystems. I use an integrative approach to examine historical ecology, community assembly, the effects of climate change on communities, and extinction. My goal is to help bridge the divide between ecological theory and on-the-ground conservation to make the best possible decisions not just for today but also for the future.

TEACHING PHILOSOPHY

I am a strong proponent of reflective teaching practices, direct mentoring, and engaging students in active learning, with meaningful, hands-on activities and experiences to allow students not only to master the material but to give them the tools they need to think critically in all aspects of their life. I am a vocal advocate for increasing inclusiveness in higher education, based on my background as a first-generation, non-traditional student, who is also part of the LGBTQIA+ community and a military veteran.

ACADEMIC BACKGROUND

- 2017 - 2019 **Postdoctoral Research Associate**, Dept. of Ecology and Evolutionary Biology, and the Center for Environmental Sciences and Engineering, University of Connecticut
- 2017 **Ph.D.** Ecology and Evolutionary Biology, University of Connecticut
Dissertation topic: “Extinction, climate change, and the conservation of parrots: developing the models and tools needed to help save the world's most endangered order of birds”
- 2010 **B.A.** (*Summa cum laude*, University Scholar, Honors Scholar), University of Connecticut, Ecology and Evolutionary Biology
